

Association of Certified Marine Surveyors

R. Craig Starns CERTIFIED MARINE SURVEYOR

Client Name: \_\_\_\_\_ Date: \_\_\_\_\_

Address: \_\_\_\_\_

Phone: \_\_\_\_\_

Type of survey: (pre-purchase, insurance, damage, other) \_\_\_\_\_

Vessel name/Official number: \_\_\_\_\_

Hull material: (FRP, wood, steel, aluminum, ferro cement) \_\_\_\_\_

Engines: (Single/Twin, OB, IB, IO, diesel, gas) Make: \_\_\_\_\_

Owner/Broker: \_\_\_\_\_ Phone: \_\_\_\_\_

Survey date: \_\_\_\_\_ Time: \_\_\_\_\_

Vessel location: \_\_\_\_\_

Haulout yard: \_\_\_\_\_ Time: \_\_\_\_\_

**Note: Arrangements for haul-out and payment for haul-out are normally the responsibility of the party contracting for the survey, and not included in the survey price.**

Sea trial: \_\_\_\_\_

Other: \_\_\_\_\_

Price US\$ \_\_\_\_\_ (Due at time of inspection)

## Terms and Conditions

Our survey procedures, described below, conform to standard practice for marine surveys by the Association of Certified Marine surveyors. The mandatory standards promulgated by the U.S. Coast Guard, under the authority of Title 46 United States Code; Title 33 and Title 46 Code of Federal regulations (CFR), The voluntary standards and recommended practices developed by the American Boat and Yacht Council (ABYC), and the standards of the National Fire Protection Association (nfpa), will be used as guidelines in the conduct of this survey, but complete compliance with such standards is not guaranteed. The following procedures are used in our surveys for the exclusive use of the person named as "Client" of this agreement. The survey is not transferable to any other person or entity and the information provided here is for the use of this client only. A condition and valuation survey will include reasonable visual inspection of all vessel parts where accessible, including the apparent condition and safety of these parts and of installed equipment. A written survey report will be prepared after a thorough visual examination of the hull topsides, machinery, rigging, hardware, and equipment. The survey report will include a comprehensive description of the vessel, a statement of the fair market value and replacement value and recommendations for items necessary to reasonably ensure safety and the fitness of the vessel for its intended service. Minor cosmetic issues not materially affecting value may not be addressed. Latent defects may exist that are not discoverable under normal inspection methods, and no warranty is offered with respect to latent defects.

All normal accessible parts of the vessel will be inspected. Fixed parts will not be removed, including fittings, fasteners, furniture, or joiner-work. Locked compartments and lockers cannot be inspected. Owners, sellers, or their representatives (captain, broker, etc.) should make sure that the vessel is prepared for survey with compartments unlocked, stores and excess equipment removed, and maximum access to all areas of the vessel provided.

Machinery, belts, hoses, tanks, and piping will be visually inspected where normally accessible. No disassembly, sampling, destructive testing, chemical or physical analysis, compression or pressure testing or will be performed except by prior arrangement and with written permission of the owner of the vessel. Machinery and equipment may be inspected while operating only when the owner or owner's representative (captain, broker, etc.) is present to operate the machinery. Depending on conditions observed visually, further testing may be recommended.

For sailing vessel surveys, spars and rigging will be visually inspected as accessible from on deck, and sails will be inspected as found furled or bagged unless other arrangements are made prior to the survey. Depending on the observations, further inspection may be recommended.

Determination of inherent design and stability characteristics is beyond the normal scope of the marine survey. The survey report is not to be considered an inventory or a warranty, either specified or implied. The survey will not express or guarantee the future condition of the vessel.

The written report will be available not more than five (5) working days after the physical inspection unless prior arrangements are made for a "rush" delivery. The report will not be made available to any other party without the permission of the client. The client is encouraged to attend the survey, and verbal consultation may be provided prior to delivery of the written report. Payment is due at the time of the inspection.

I understand that the survey report does not constitute a guarantee or warranty of the subject vessel. The report is a statement of the apparent condition, a list of recommendations, and an opinion of the Fair Market Value at the time of the survey only. I have read and hereby agree and consent to the terms and conditions of this agreement.
